

FOR IMMEDIATE RELEASE: April 13, 2015

## Shibuya Hoppmann Corporation INFORMATION

### Our Best Just Got Better!

April 13, 2015, Manassas, VA – SHIBUYA HOPPMANN CORPORATION, a member of the Shibuya Group and a prominent machine manufacturer of automation systems equipment, is proud to introduce the newly upgraded 2015 models of our Elevating Prefeeder line: EP-04, EP-08 and EP-10.

Detailed view of the new hopper on the 2015 EP-08

Designed on the same basis as our original Elevating Prefeeders, the 2015 models handle a variety of small and medium sized parts. The improvements include: improved hopper construction (eliminating most welded seams and no internal hardware to catch product), reconfigured drives to simplify the design and a 56C face motor mounting to allow a wide array of motor options. The prefeeders construction is now manufactured out of the ultra-durable, T304 stainless steel.

For more information on our updated EP-04 EP-08 and EP-10 Elevating Prefeeder models, please visit [www.shibuyahoppmann.com](http://www.shibuyahoppmann.com).

#### About Shibuya Hoppmann:

Recently Headquartered in Manassas, Virginia, Shibuya Hoppmann is a wholly owned subsidiary of Shibuya Kogyo Co., Ltd, of Kanazawa, Japan. We are a leading engineering machine manufacturer of centrifugal feeding systems, continuous motion assembly and placement systems, labelers, isolators, decontamination systems, and filling and/or capping equipment for aseptic or sterile environments (bottles, vials, ampoules, syringes, cans and other containers). We provide unmatched technology, quality, innovation, customer service, reliability and experience for automated industrial equipment. Our foundation is particularly strong in the pharmaceutical, personal care, household products, and food and beverage industries.
